

# GLASSINE TCF

## Product Profile

GLASSINE TCF paper is a white, cellulose based, total chlorine free paper which is used for windowing of envelopes and for the manufacturing of fully translucent glassine envelopes.

### Properties

#### TRANSPARENCY

Highest transparency standard for glassine paper. The translucent paper can be used on most high-speed envelope window patching machines and is acceptable for use with optical reading equipment.

#### FLATNESS

Very good flatness due to narrow tolerances on the humidity residu. Excellent gauge profile, resulting in a flat glassine sheet or web

#### STORAGE

Rolls are individually wrapped in PE-bags to avoid humidity damage.

#### ECOLOGY

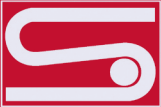

GLASSINE is produced by means of a total chlorine free process. This and its inherent recyclable and repulpable characteristics make GLASSINE paper a fully environmental-acceptable product.

#### TECHNICAL INFORMATION

GLASSINE product data sheet, recommendations for processing and shelf life are available on request.
