

POLYFLEX 150 SILVER

Product Profile

POLYFLEX® 150 SILVER (PF150SV) is a one-side metalized, biaxially highly oriented 100% polystyrene film, designed for lamination to EPS (Expanded or Foamed Polystyrene).

Properties

GLOSS

An ultra-high gloss level is obtained through silver metalizing and the application of a lacquer finish.

The laminated product has a luxurious aspect (e.g. for meat trays).

YIELD

The low specific density of PF150-Silver brings higher yields and an outstanding price/quality ratio.

EASY PROCESSING

High rigidity, good flatness and strength guarantee easy machining on all laminating equipment.

FOOD CONTACT APPROVED

PF150 Silver complies with food contact regulations. The protective lacquer on the metalized side prohibits migration of metal particles into the food. Certificate available on request.

DIMENSIONAL STABILITY

PF150 Silver contains no plasticizers, and remains unaffected by normal temperature fluctuations ranging between -35°C and +75°C. This dimensionally stable film will machine without problems.

*Polyflex 150 silver,
your choice for eps-lamination !*
